

# Make the Switch to Rapid7 InsightVM

InsightVM, our leading vulnerability management solution, provides full visibility of your modern ecosystem. InsightVM prioritizes risk based on attacker analytics, contains threats, and promotes collaboration across security, IT, and development teams to drive remediation.

With InsightVM, here are just a few things you can do to advance securely:

1. **Discover and assess ALL external-facing assets:** [Attack Surface Monitoring with Project Sonar](#) gives you visibility on all of your external-facing, internet-connected assets—both known and unknown—which can then be assessed in InsightVM.
2. **Prioritize real risk:** The [Real Risk score](#) in InsightVM factors in CVSS, malware and exploit exposure (via Metasploit Framework and Exploit DB), exploitability, vulnerability age, and asset criticality that is unique to YOUR business.
3. **Track your efforts against goals and SLAs:** [Goals and SLAs](#) help you measure remediation progress, meet organizational policies, and hold teams accountable.
4. **Accelerate remediation with automation:** InsightVM orchestrates patch management tools and ticketing systems like IBM BigFix and ServiceNow to expedite the remediation process.
5. **Integrate with 40+ technologies:** Integrations include ServiceNow, CyberArk, Splunk, Jira, IBM BigFix, Microsoft SCCM, and more. See a full list of Rapid7 partners [here](#).

## Promotion Overview

Switching from one vulnerability management solution to another can seem insurmountable, especially when considering financial and operations costs, changes to processes, and re-training of staff. To remove these burdens, we're excited to provide our InsightVM promotion, which makes the switch painless.

## The Rapid7 InsightVM Offer:

### PROVIDING FULL VISIBILITY

Free InsightVM period (1 year maximum) co-termed to your competitive renewal, plus 1 year InsightVM contract

### SETTING YOU UP FOR SUCCESS

Free InsightVM 2-day quickstart deployment (additional charge for deployments requiring more than 2 days)

### SECURING YOUR WEB APPS

Free 3 InsightAppSec apps

For more information on this program, reach out to your sales representative.
